

State Historic Sites Rental Rates and Admission Fee Changes

To comply with G.S. § 121-7.3, below are State Historic fee changes effective July 1, 2019. The changes are identified in red font and italicized.

State Historic Sites rental fees have not changed for years. To determine the fee changes, Historic Sites compared its fees to nearby like-entities to make the sites more competitive with like-entities who offer similar amenities. Historic Sites also reviewed the fees and sought to standardize them for its sites within the same region. The receipts generated from the fees are used to support programming and operations.

The rental rate changes are implemented with the understanding that each impacted Historic Site must anticipate the increased costs of wear-and-tear as a result of these necessary, income generating rentals.

These fee increases are presented with the understanding that all of visitors will be given an opportunity to explore Historic Sites, as much as possible, for free and that they will receive support for this free experience (waysides, tour brochures, etc.).
